

# HA5IW

## Noise bothers you on the bands?

*How can you be a “professional ham” amongst the hams? Here you can find the alpha and omega of the ham radio.*

Electronics. Telecommunication. Communication. Magical words. If you need help to work out your ideas from the very simple one up to extreme level you are at the right place. Here are some examples from the offer of HA5IW Ltd:

- If you have very special circumstances or needs which cannot be purchased...
- Or you don't want to buy mass produced device because you want something no one else has...
- Your neighbour makes big noise on the air...
- Or you make big noise...
- Beside ham radio you are a fun of hiking and would like to do both at the same time but carrying the whole room might be to much...
- You cannot find the way out from the labyrinth of filters or switches...
- Your finger is speedy but you need a good keyer...
- You feel you had too few experiments on the physics class...

If you came across any of these problems you are at the best place. If you haven't but you have something similar the is your page.

*Why the HA5IW Ltd.? What do all these mean translated into services?*

- *Constructing and fixing telecommunication equipments*
- *Constructing and fixing radioamateur (ham) equipments*
- *Wireless industrial communication solutions*
- *Antenna systems*
- *Wireless computer systems*
- *Planning, constructing, testing, installing of professional GPS/GSM based remote control systems*

What's your guarantee?
